

## THREE GOOD REASONS TO STAY HOME DURING THE THANKSGIVING LONG WEEKEND

**1** To protect people 70 years of age and over, who are at greatest risk of death if they catch COVID-19

They are our parents and grandparents, the people who have built Québec.

**2** To protect our children so that they can continue to go to school

Three percent of Québec children cannot attend school at this time because their classrooms are closed.

**3** To protect the capacity of our health network to treat the sick

Should the number of hospitalizations increase excessively, there is a genuine risk that the system will be unable to care for you if you get sick.
